

Distributor Logo

Dear (customer),

We appreciate your business, and for the continued opportunity to offer a variety of quality products, and information that will meet your gasketing needs.

With a focus on quality, we are happy to offer you, a valued (distributor name) customer, a gasket tape that addresses all of the challenges of reliably sealing large glass-lined-steel flanges to contain aggressive media, protect equipment, and reduce emissions.

GORE® Gasket Tape Series 1000

Made of 100% expanded PTFE (ePTFE), this highly conformable tape is chemically inert, and highly resistant to creep, cold flow and clamp-force loss. Its proprietary barrier core maintains an extra tight seal even at low load, thus providing the following benefits:

- Seals more than 10 times tighter than other ePTFE gasket tapes
- Allows full use of specification range of the glass lined steel equipment
- Enables longer maintenance life cycles as demanded by leading chemical producers

Please feel free to reach out to (contact name) at (contact phone number) or (contact email) if you have a particular application for which you would like to explore the use of this form-in-place gasket material.

Click on **GORE® Gasket Tape Series 1000** for more technical information about this product. (or suggest link through distributor website, and then to GORE)

Thank you for your continued support!
